

The 3rd IUPAP International Conference on Women in Physics

October 8 - 10, 2008
Seoul, Korea

ICWIP 2008 Unanimous Resolution: Applicable Beyond Physics

1. Form **regional or national working groups** for women [and minorities] in [any scientific endeavor where they are underrepresented]
2. Implement **site visits** ["peer review"] as an effective tool for improving the "climate" of scientific workplaces
3. Actively encourage conference organizers to provide (a) **professional development** workshops for attendees, and (b) **outreach** aimed at the public & to excite both girls and boys about science from an early age [**AAAS & AAPT do this routinely**]
4. Conduct [national and] **global surveys** [in several languages] to understand differential pathways and assess progress; and make useful resources available globally through the internet
5. Use all mechanisms and networks to encourage **broad participation in the global survey** in their countries.
